DETAILED ACTION

Claims 2-7, 9-11, 13 and 14 lack claim identifiers. All claims must have identifiers. The proper identifier for each of these claims would be (original) since they were not amended. In future amendments each claim must have an identifier.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 2, 14 and 17 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by either newly cited Berkel, Jr. or newly cited Greb, et al.

Regarding claim 17, the boom in each reference is moved by an hydraulic cylinder and contains a tool at one end. The act of operating the control in each reference broadly records the position. Particularly note the guage in Berkel.

Claims 12, 13, 14 and 17 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by newly cited Eiler.

Regarding claim 17, the boom arm in Eiler is moved by an hydraulic cylinder and contains a tool at one end. The act of operating the control in Eiler broadly records the position.

Claims 1-11, 15 and 16 are allowed.

In summary, the use of a spring biased arm to record the position of an arm by connecting the arm to a sensor is not patentable as evidenced by the newly cited art.
